what is the stc business cyber path programme?

the stc business cyber path programme is a professional learning platform created to help organisations upskill their teams in today's most critical business and technology areas, from cybersecurity and governance to risk and compliance. delivered by expert instructors in partnership with leading global training providers, the hub offers internationally recognised certifications and structured learning paths that align with real business needs.

training is conducted live and online, so professionals can learn from anywhere without needing to commute to a classroom, while still following a fixed schedule led by certified experts.

why study with stc business?

• certified programmes
access globally accredited programmes from ISC2, EC-Council, ISACA, and more.

• real-world application
courses are designed around real-world challenges, helping your team translate what they learn into immediate business value.

• flexible delivery that fits your schedule
training sessions are delivered online, so learners don't need to travel, while fixed weekday or evening sessions provide the structure professionals need to stay on track.

• experienced instructors
our certified trainers come from high-level backgrounds in government, banking, telecom, and other critical sectors. each brings deep field knowledge and a track record of upskilling professional teams across the region.

• cost-effective training:
study from anywhere in the country without flying abroad. our cost-effective training model gives professionals and enterprises access to high-level certification programmes right here in Bahrain.
